# Welcome

Your dentist has referred you to a prosthodontist. Prosthodontists are dental specialists in the restoration and replacement of teeth. After completing dental school, prosthodontists receive additional specialized training in an accredited graduate prosthodontic education program. Prosthodontists are trained in state-of-the-art techniques and procedures for treating many diverse and complex dental conditions and restoring optimum function and esthetics. These include: crowns, bridges, dental implants, complete and removable partial dentures, and traumatic injuries to the mouth's structures and/or teeth. Serving as the "architect" of a dental treatment plan, prosthodontists collaborate with general dentists and other specialists to develop solutions to your dental concerns. We look forward to helping you with your dental treatment.
